Subject: RE: Re-organized Response to Comments
Attachments: Summary of Peer Review Comments and EPA Responses_AppendixD_070913a_SV.docx

Hi Barbara,

Here are my responses for the toxicokinetics part. John checked the exhaled breath response. Check the other ones for the level of detail and information and let me know if you have any comments/suggestions. I will be happy to revise them.

I am compressed tomorrow, but will be checking my mails.

Sury

Subject: Re-organized Response to Comments

Hello Team,

Our Response to Comments document was reviewed and in response to that review I re-organized it. It is now based explicitly on the summary chapter (pp 3 – 15) and includes all comments verbatim in the order discussed. I tried to retain most of the responses in this format; it was pretty straightforward because those comments were in there already. But some topics will need to be written *de novo* (e.g. toxicokinetics), although most of these are already under revision or a comment had not been drafted yet.

Please revise your responses as needed. You may want to include a few comments or recommendations from the detailed chapters that are important and did not make it into the summary. Please send me your revisions by Friday, July 12th COB.

In return, I am cancelling our team meeting this week so that you can work on this important item.

Regards, Barbara
